

Dear reader

in the present issue VIRT&L-COMM is happy to host a significant number of reports and papers written by members of the ECTN Association with a particular attention to the arguments discussed at the recent 2018 General Assembly held in Prague. Our e-magazine has, in fact, devoted since its birth significant attention to the educational activities of ECTN and we are glad to offer, when requested, support to the continuation of the publication of the Association Newsletter as a section of our Open Journal System e-magazine.
