

INORGANIC CHEMISTRY (IC3) LIBRARY

Sanjiv Prashar, *Rey Juan Carlos University, Madrid, Spain*

- I need full and easy access to all the questions in the database.
- All questions in the development stage need to be in my possession. Currently I don't know exactly who has them. Help has been requested to Marina Rui and Gino Paolucci.
- The IC3 team only has two active members. Peter Weinberger and myself.
- Many thanks, to David Cardin and Gino Paolucci for their immense work. The idea is to enlist new (young) members to the IC3 team.
- Afterwards, and hopefully using a system similar to that of Michal Woźniakiewicz, embark upon the revision, translation and expansion of the questions in the library.
