

## **2021 SHORT REPORT FROM THE KRAKOW EChemTest® NTC**

Prof. dr hab. Lucjan Chmielarz, Jagiellonian University, Kraków, PL ([lucjan.chmielarz@uj.edu.pl](mailto:lucjan.chmielarz@uj.edu.pl))

As a chemist specialised in chemistry and technology of catalytic materials and heterogenous catalysis in environmental applications I have started my activity in ECTN in 2006. At the beginning I was involved in the CHEMEPASS project (Erasmus Mundus, 2006 - 2009), focused on development of educational standards and didactic tools for chemical engineering and technology. Then, I was involved in various ECTN activities, such as development of question's database for EchemTest e in particular for "Chemistry in everyday life" and for the working group "Activities of Students". Since 2018 I am a member of the ECTN Administrative Council and I collaborated with prof. Artur Michalak in organising the ECTN General Assembly in 2019 held in Kraków. Recently, I actively participated in the preparation of the DISTINCT project application (Erasmus+) and the ECTN promotion for Labels and EchemTest at the Polish universities. Moreover, I am acting as an expert of the Polish Chemical Association (PTChem - Chemicus) for ECTN Labels.
